For Release on September 1, 2011:

Automatic Protection Systems Acquires Southwest Fire Protection Assets

Automatic Protection Systems (APS) is pleased to announce that it has expanded its fire protection capabilities by creating a new subsidiary with the assets of Southwest Fire Protection. This is an exciting step forward for APS as it adds a top fire sprinkler company to our portfolio of fire protection offerings.

APS and its related entities now provide a breadth and depth of fire protection that no other company can match in the locations in which we operate. This technical capability, combined with our commitment to our customers, employees, and communities make us easy to work with. We are your single source for everything fire protection including:

- Engineering & Design
- Project Management & Installation
- Inspection, Testing, Maintenance, & Repair
- Training

We have staff with expertise in the following areas of fire protection:

- Special Hazards/High Value Assets
- Fire Sprinklers
- Fire Detection & Alarm
- Gas Detection & Alarm
- Restaurant Hood Fire Suppression
- Vehicle Fire Suppression
- Portable Fire Extinguishers
- Life Safety Equipment
- Fire Protection Facility Management for National Corporations

Please let us know how we can help your business protect against the threat of fire and life safety hazards. We would be delighted to work with you.

Best Regards,
The APS Team
